

Do not let the Bell to dominate everything. Competition requires competitors to be alive. If the FCC lifts the dominant classification from the Local Exchange Carriers (Bells), it will limit competition to a duopoly consisting of a bell and a cable company. Competition in the American Telecom marketplace will not be incentivized, it will be torpedoed. ISPs and CLECs will die, consumers will be deprived of choice and the FCC will be wholly to blame for the travesty. DO NOT DO IT. Allow for the people to have a choice. For some reason, the smaller ISP's are working at almost half the price of the bigger businesses. These smaller businesses work because they strive to maintain a happy client whereas larger business don't. They do as they please. Either you adapt to their big name or you get out. I know I have been their victim. Chairman Powell: Please do not sell out to BIG BUSINESS, at the expense of competition and the small businesses of our country.
